

BUSINESS CONTINUITY POLICY

MPP “Jedinstvo” a.d. plans, implements, maintains, reviews and continuously improves the business continuity management system to protect itself against incidents that cause interruptions or disruption of significant aspects of the business.

In order to ensure that the realization of business with users of our products and services takes place with minimum interruption, the main business risks that threaten business continuity have been identified, and appropriate prevention measures and strategies for rapid recovery have been developed, are being maintained, reviewed and updated.

The policy objectives are:

- *Protection against incidents that cause disruption and interruption of significant work processes, reduction of the probability of their occurrence, preparation of responses to them, as well as recovery from them, if they occur.*
- *Identification and control of potential and actual risks of critical processes, in order to protect companies, users and other stakeholders.*
- *Protection of property, assets and intellectual property necessary for business.*
- *Increased resilience and willingness to react when overcoming any real business threat.*
- *Reduce downtime during incidents, and speed up recovery time.*
- *Development and implementation of an adequate Business Continuity Strategy and Plan (BCP), their implementation, regular testing and updating.*

The Management, all teams and employees are required to effectively implement this policy, associated plans and procedures in all areas of business.

MPP “Jedinstvo” a.d. has harmonized the Business Continuity Management System with the requirements of the ISO 22301: 2019 Standard and the good work practice it encompasses.
