

ENERGY POLICY

MPP “Jedinstvo” a.d. is committed to the rational use and responsible behaviour towards the use and consumption of energy. The application of an efficient and effective energy management system is a permanent commitment of the Management and an integral part of responsible behaviour towards the conservation of energy resources and environmental protection is aimed at:

- *Improving energy efficiency in the implementation of business activities and continuous improvement of energy performance.*
- *Providing and making available information on energy consumption as a basis for improving energy efficiency, which is achieved by setting clear and measurable goals and programmes for the rational use of energy.*
- *Business processes, which, with the participation of all employees in accordance with established competencies and responsibilities, without exception, are oriented towards meeting legal, technical regulations and harmonized requirements of other stakeholders in terms of energy use, consumption and energy efficiency.*
- *Education and innovation of knowledge which is an ongoing process for raising the level of awareness and commitment of the Management and all employees for the development and improvement of energy management system.*
- *Analysis of energy consumption requirements in the procurement of goods and services. They must be applied to all our facilities and processes, including the use of vehicles in order to procure equipment, devices and services that will improve energy performance and reduce the impact on the environment.*
- *Inclusion of energy performance improvement activities that are a permanent, integral part of the design and development of products and services.*

For the development and improvement of the business, **MPP “Jedinstvo” a.d.** will have a key support in the development and improvement of energy management system in accordance with the built-in good market practice according to the ISO 50001: 2018 Standard.

March, 2020
